

HS A 682 Section 02
Seminar: Medieval and Renaissance Medicine
Professor Gavitt
Office hours, T-Th 11-12 and by appointment
Humanities 215
Office phone 977-2904
email: gavitt@slu.edu

Welcome to History 682, a seminar in the History of Medieval and Renaissance Medicine. This course will focus on the History of Medicine from Late Antiquity until the Scientific Revolution. We will read various treatises concerning medical theory, and both primary and secondary sources concerning medical and social practices. You will notice that the course is divided into two main parts. The first five weeks will be devoted to a chronological survey of the history of medicine. The second six weeks will be devoted to special topics. I will have at least one, and possibly, two, guest lecturers, but in general the format of this course will be entirely discussion. Every week I will ask you to write short papers or reviews of about 750 words each, but the majority of your grade (about 80 percent) will be the result of the research paper of about 9000 words you will complete over the course of the semester. Your research will be a combination of primary and secondary sources on the history of classical, medieval, and Renaissance medicine, and you are encouraged to use as many resources in the St. Louis area as possible. Obviously the more languages you have the wider choice of topics you will have. **I need a 100-word abstract and bibliography by Thursday, January 28, at 5:00 p.m.** The final paper is due Friday May 6 at 5:00 p.m. Please e-mail both to me as a Microsoft Word or Word Perfect file attachments. This paper will be worth 80 percent of the grade.

The remaining 20 percent of the course grade will come from the short papers and class participation. This syllabus is not a contract: it will be refined and expanded over the course of the semester. Whenever I find reliable information on-line, I will link it up to the syllabus and re-send it to you. We will also make as many "field trips" as possible to such places as the Vatican Film Library, the Missouri Botanical Garden, and the Archives and Rare Books section of the Washington University School of Medicine.

Although I will be communicating most course announcements via email, please use my office hours to begin discussing paper topics with me. I will be happy to make appointments outside of office hours for students who cannot meet with me during regular office hours.

Finally, I would like to acknowledge publicly the assistance of Dr. Walt Schalick of Washington University, who suggested much of the material for this syllabus.

Part One: Chronological Survey

- I. Medicine and the Classical Tradition (January 21)
- II. Medicine in Late Antiquity and the Early Middle Ages (January 28)
- III. Arabic Medicine (February 3)
- IV. Western Medieval Medicine (February 10)
- V. Renaissance and Early Modern Medicine (February 17) – at Wash U. Medical Center Library 7th floor (Archives and Rare books), with a guest lecture by Lilla Vekerdy.

Part Two: Special Topics

- VI. Moral and social implications of disease February 24
- VII. Doctors, hospitals, barbers, and surgeons March 3
- VIII. Herbs and pharmaceuticals (March 17) guest lecture by Dr. Walt Schalick (this date is still tentative).
- IX. Plagues and Peoples (March 24)
- X. Madness and civilization (March 31)
- XI. sexuality and gender (April 7)

There will be no regular class sessions after February 17 in order to give you time to work on your research papers. There will, however, be guest lectures and “field trips,” some of which may be scheduled outside normal class time to take into account the hours of libraries.
